

Combined Expandable Wire Finder

Wellvene's Combined Expandable Wire Finder has been specifically designed to locate the top of any sized wire or cable that has been lost in a well.

Supplied with an adjustable sub, the Wire Finder can be expanded to suit the required tubing ID and wellbore restrictions relevant to the wire or cable being fished.

- Available for a range of completion sizes from 2 3/8" tubing up to 9 5/8" casing
- Optional interchangeable components help reduce stock and costs
- Reduces operational risk of running through wire

FEATURES

- High tensile/yield design
- Interchangeable and adjustable to minimise cost and maximise inventory
- Size ranges available to suit all tubing grades
- Field redressable
- Supplied with any industry connection
- Sale and rental options are available

CONFIGURATIONS

Although the wire finder can be run standalone, optional assemblies allow it to be configured as a:

- Wire finder grab
- Wire finder spear
- Wire finder grab with spear

Job-specific grabs and spears can be supplied with a varied number of standard or offset barbs to retrieve smaller wire or larger cable, including capillary string sizes.

The wire finder can also be supplied to be suitable for housing various BHA's internally to provide added protection of the toolstring in cases where loose wire or cable may be present at various depths.
