

# Compact Flapper Status Verification Tool

Wellvene's Compact Flapper Status Verification Tool (CFSVT) provides the simplest and most effective way to eliminate doubt, reduce risk and verify TRSSSV Flapper status.

## DESCRIPTION

Simply connect the top and bottom sub to any standard wireline stem\*, and the tool is ready to run. Made up of only two parts, the CFSVT can be mobilised in a peli case by air freight to meet urgent operational requirements.

- Simple assembly and operation
- Compact design to allow for air freight in unexpected well entry situations

\*length based on TRSSSV dimensions

## FEATURES

- Top and bottom assemblies supplied by Wellvene
- Standard customer-owned wireline stem used to space out based on TRSSSV length (can be supplied by Wellvene as required)
- Emergency disconnect feature incorporated
