

Radial Brush

The Wellvene Radial Brush is part of the wider Wellvene Brush Range, and provides a robust alternative to the 360° Rotational Brush when scale or debris is harder to remediate.

DESCRIPTION

Available with brass bristles to protect seal bores from scoring damage and steel bristles for severe scale issues, the brush sections are fully interchangeable on-site.

FEATURES

- Full 360° coverage
- Built-in swivel sub to eliminate wire torque
- Slickline, E-Line, Coil or Pipe deployed
- Supplied to suit any size and type of respective seal bore (typically within 2 3/8" to 7" completions)
- Interchangeable brush subs for easy change/redress on-site
- Brush can be run in conjunction with landing nipple drift
