

Remote Opening Cycle Valve

Wellvene's Remote Opening Cycle Valve (ROCV) offers a simple yet effective remote opening solution to support P&A activity.

DESCRIPTION

Eliminating the use of single pump open subs, our Remote Opening Cycle Valve offers a simple and effective remote opening solution to support P&A activity.

The ROCV can be supplied in conjunction with Wellvene's Lock Mandrel or WellVeX™ to suit any size and type of landing nipple profile. Alternatively, the ROCV can be provided to connect to any OEM lock mandrel or bridge plug.

- Reduces operational risk, time and cost
- Improves operational efficiency
- Eliminates the use of single pump open subs

FEATURES

- Designed for P&A operations (production and annulus bore)
- Interventionless and on-demand remote opening
