

## Tubing Hanger Crown Plugs

Engineered for deployment in horizontal subsea trees, the Wellvene Tubing Hanger Crown Plug has been specifically developed to provide the industry with a reliable barrier for subsea operations. The Plug has been designed and qualified in accordance with the API 14L specification, and can be provided in a configuration that matches your operational pressure and temperature requirements.

### DESCRIPTION

The top no-go design ensures a reliable locking mechanism, streamlining operational procedures and preventing misruns. Given its dedicated wellhead plug nature, the Wellvene Crown Plug is versatile, suitable for various tree or tubing hanger plugging applications, and can be utilised in Wellvene or OEM profiles.

### BENEFITS

- Retrofittable to any landing nipple design
- Helps reduce costs associated with tree and TH servicing
- Efficiently cuts down on time and costs by utilising slickline for installation
- Field-proven technology
