

Used to find and recover broken wire during fishing operations, Wellvene's Wire Grab provides a highly-adaptable tool that can suit a range of specifications.

DESCRIPTION

Run in conjunction with our Multi Pin Running Tool (MPRT) the Wire Grab with built in Wire Finder is used to locate the top of parted wire in the well and take hold with the multiple barbs and retrieve to surface. If the wire cannot be retrieved, the MPRT release mechanism allows the user to disconnect leaving a clear fish neck in place for reconnection during alternative retrieval operations.

FEATURES

- Available with adjustable finder to suit a range of tubing ID's / restrictions
- Designed to suit specific applications with range of size and number of grab arms.
- Ideal for use in conjunction with Wellvene Multi Pin Running Tool
- Connection options to suit customer requirements
- Selected components QPQ treated
